PROFESSIONAL SUMMARY

Computer Science (CSE/CSIT) undergraduate with experience shipping web applications and data-driven systems in React.js, Firebase, Python, and SQL. Designed and deployed an end-to-end campus placement platform — a candidate–job matching engine paired with a real-time application tracker — serving 300+ students. Foundations in Data Structures, OOP, DBMS, and System Design. Interested in full-stack systems and applied ML; seeking software engineering / SDE intern roles.

EDUCATION

Maharaj Vijayaram Gajapathi Raj College | BTech – CS & IT (CGPA: 8.99) **2023 - 2027**

Sri Chaitanya Junior College | Intermediate MPC – 96.8% **2021 – 2023**

TECHNICAL SKILLS

ML & AI: Python, NumPy, Pandas, Scikit-learn (learning), Google Colab

Data & Backend: SQL, MySQL, Firebase Firestore

Languages & Tools: C++, Java, JavaScript, Git, GitHub, VS Code, Linux, React(learning), HTML, CSS, C, Figma

Concepts: DSA, OOP, DBMS, OS, Statistical Reasoning

PROJECTS

Campus Placement Portal | *React.js, Firebase, Firestore* *Jan 2024 – Apr 2024*

- Engineered a **rule-based resume scoring engine** across 12 parameters — delivering keyword match scores, skills gap analysis, and personalized job recommendations for 300+ students, raising relevant application rate by an estimated **40%**
- Architected **dual-role access control** (student/admin) using Firebase Authentication and Firestore security rules, ensuring zero cross-role data leakage across all stored profiles
- Shipped a real-time application tracker via Firestore listeners, eliminating page refreshes and cutting student status-check time by ~60%
- Deployed a **rule-based chatbot** resolving 15+ recurring placement FAQs autonomously, reducing repetitive administrative workload by ~30%

Online Quiz System | *C++* *Aug 2023 – Oct 2023*

- Built a **C++ quiz engine** drawing randomized questions from a pool of 50+ items across 10+ topic categories per session, with zero-repetition guaranteed via tracking arrays and optimized randomization logic
- Achieved **real-time scoring and accuracy feedback under 100ms** while trimming memory footprint by ~25% through optimized STL arrays and vectors over naive implementation.

EXPERIENCE

Salesforce — CRM & Cloud Intern (Virtual) *May 2025 – Jul 2025*

- Configured **5+ lead-scoring models and automation rules** across 3 sales-pipeline scenarios, refining CRM routing decisions and lifting simulated lead-prioritization throughput by an estimated **35%**
- Built hands-on fluency in **data pipeline management, workflow automation, and cloud CRM tooling** through 40+ hours of guided coursework and 4 industry case studies on AI-driven enterprise optimization,

CERTIFICATIONS

- AWS Solutions Architecture — Job Simulation
- Python Certification — Sololearn
- SQL Certification — Sololearn
- Mathematics for Computer Science — edX
